

VEXIS[®]

HERBICIDE

GRANULAR

A Powerful Weapon Against Sedges and Kyllingas!

WHAT IT IS

Vexis[®] Herbicide Granular uses the proprietary active ingredient pyrimisulfan to deliver exceptional control of sedges and kyllingas, plus listed broadleaf weeds. The granular formulation reduces the potential for drift or off-target application, and Vexis is labeled for use on listed cool-season and established warm-season turfgrasses, including improved varieties of St. Augustinegrass. For best results, water-in granules within 48 hours of treatment.

WHAT IT DOES

Vexis Controls

- Nutsedge (purple and yellow)
