

TURF-TYPE PERENNIAL RYEGRASS BLEND

# Highest Germination Rate | Advanced Testing | Unparalleled Standards

### **FEATURES**

- · Quick establishment
- · Dense growth habit
- · Dark green color
- Fine texture
- · Varieties thrive in cool season climate
- Gray Leaf Spot resistance
- · Excellent traffic tolerance

#### AGRONOMIC CHARACTERISTICS

Double Eagle Blend contains three advanced generation cultivars of turf-type perennial ryegrass. The varieties used in Double Eagle Blend have all undergone university trials and have shown high turf quality, dark green color, traffic tolerance, and resistance to Gray Leaf Spot. The endophyte levels in these varieties make Double Eagle Blend resistant to surface feeding insects.

# **SUGGESTED USAGE**

Golf course tees, fairways and roughs, home lawns, athletic fields, commercial turf areas, parks and playgrounds.

## **TURF ESTABLISHMENT GUIDELINES**

Adequate seed bed preparation Is Important In new turf grass establishment as well as in overseeding applications. Check soil pH and apply LESCO starter fertilizer prior to seeding. Cool-season grasses germinate best in the 60° to 85° F (16° to 30° C) soil temperature range. Frequent light irrigation and/or seed starter mulch is required for optimum germination. Germination should be visible within 14 days; complete turf establishment will take two to six months to exhibit mature growth characteristics.

#### RECOMMENDED MAINTENANCE PRACTICES

Highest quality and durability are reached using moderate maintenance levels. Allow turf to establish prior to heavy use. Mowing height at 1 1/2" to 2 1/2" is recommended (lower mowing heights require higher maintenance).

# **ENVIRONMENTAL TOLERANCE**

Double Eagle is best suited in cool humid and cool arid zones of the United States for permanent turf establishment. Double Eagle is also well suited for overseeding warm season grasses in winter dormancy in the warm arid and warm humid zones.

#### **INGREDIENTS**

100% Turf-Type Perennial Ryegrass (3 Varieties)

#### **SEEDING RATES**

New Establishment: 4-6 lb./1000 sq. ft.

Renovation: 2-3 lb./1000 sq. ft.

**Overseeding:** 10-15 lb./1000 sq. ft.

## **PACKAGING INFORMATION**

50 lb. bag #30-62-950 25 lb. bag #30-72-970 10 lb bag #018826

Treated with Apron® Fungicide #23-05-015 Woven Polypropylene Bags
